

Dear Hiring Manager,

I am writing to express my interest in the Junior Software Engineer position at eHealth.co.id. As an Information Systems student at Universitas Andalas with over a year of hands-on experience in backend development and proficiency in frontend technologies, I am excited about the opportunity to contribute to your team and support eHealth's mission in improving healthcare services through innovative technology.

During my previous experiences, such as at Metro Software and Meets Indonesia, I have worked on diverse projects ranging from e-commerce platforms to mentoring systems. These roles allowed me to not only sharpen my technical skills—such as working with technologies like React.js, Node.js, and PostgreSQL—but also to develop my problem-solving capabilities in fast-paced, client-focused environments. I have a proven track record in improving system performance, ensuring code quality, and delivering scalable solutions that align with business needs.

In particular, I am drawn to eHealth.co.id's mission of making healthcare more accessible and efficient. I am passionate about leveraging technology to solve real-world problems, especially in sectors that directly impact people's lives. I am particularly excited about your company's approach to digital health solutions and the opportunity to be part of a team that is shaping the future of healthcare technology.

I am confident that my technical skills, passion for innovation, and drive to continuously learn and grow would make me a valuable asset to eHealth.co.id. I would welcome the opportunity to contribute to your team and am eager to further discuss how my skills and experience can benefit your organization.

Thank you for considering my application. I look forward to the possibility of discussing my qualifications in more detail.

Sincerely,
Mhd Ulil Abshar
